# YASH DEVIDAS SONAWANE

**DevOps & Cloud Engineer | Kubernetes | AWS | Terraform | CI/CD | GitOps | Open to Internship**

+91-8468815140 | yashsonawane235@gmail.com | github.com/yashsonawane25 | linkedin.com/in/yash-sonawane01 | dev.to/yash_sonawane25 | yashsonawane.42web.io

## SUMMARY

B.Tech student with strong hands-on experience in Kubernetes, Docker, Terraform, and AWS through self-built production-grade projects. Electrical Engineering background provides a solid foundation in systems thinking and fault-diagnosis, applied directly to cloud infrastructure and SRE. Active technical author with 5,000+ followers on DEV Community. Certified in Kubernetes (CKA), Terraform, Docker, and GCP (training). Seeking a DevOps / Cloud Engineering internship to contribute and grow within a real team environment.

## TECHNICAL SKILLS

| | |
|---|---|
| **Cloud & Infra** | AWS (EC2, VPC, ALB, RDS Multi-AZ, S3, CloudWatch, Secrets Manager), GCP, Azure |
| **Containers & GitOps** | Kubernetes, Docker, Helm, Argo CD, Pod Autoscaling, GitOps Workflows |
| **IaC & Automation** | Terraform , Ansible, Bash/Shell, Python Automation |
| **CI/CD & Observability** | GitHub Actions, Jenkins, Prometheus, Grafana, Alertmanager, Linux/Unix Admin |
| **Languages & Tools** | Python, Bash, Go (basic), FastAPI, Git, Claude API, RESTful APIs |

## PROJECTS

**PostmortemAI — AI Incident Response Tool** *Jan 2025 – Present*

*FastAPI · Claude API · Prometheus · Alertmanager · Kubernetes · GitHub Actions · Docker*

- Built an AI tool using FastAPI and Claude API that reads Prometheus alerts and automatically writes incident postmortem reports, reducing manual documentation time significantly.
- Set up a CI/CD pipeline with GitHub Actions and deployed the app on Kubernetes using a Helm chart.

**KubeHeal AI — Self-Healing Kubernetes Project** *Jan 2025 – Present*

*Kubernetes · Python · Prometheus · Helm*

- Built a Python-based tool that watches Kubernetes pods via Prometheus and automatically restarts or fixes failing pods without manual steps.
- Added pattern detection so the tool improves its responses based on past failure data.

**Cloud-Native Microservices Voting App (AWS + Kubernetes)** *Feb 2026*

*Kubernetes (Kind) · AWS EC2 · Argo CD · Redis · PostgreSQL · Prometheus · Grafana*

- Deployed a multi-service voting app (Python, Node.js, .NET) on AWS EC2 using Kubernetes with GitOps via Argo CD; configured Prometheus and Grafana for monitoring.

**AWS 3-Tier Architecture using Terraform** *Feb 2026*

*AWS · Terraform · Auto Scaling · ALB · RDS Multi-AZ · CloudWatch*

- Wrote modular Terraform code to deploy a 3-tier AWS setup with VPC, subnets, load balancer, EC2 auto scaling, and Multi-AZ RDS following real-world IaC practices.

**NotionOps AI — Automated DevOps Documentation** *2026*

*Notion API · Python · CI/CD Webhooks*

- Built a Python automation that listens to CI/CD pipeline events and writes deployment notes, incident logs, and runbooks into Notion — eliminating manual documentation.

## CERTIFICATIONS

- ✓ Certified Kubernetes Admin (CKA) — KodeKloud
- ✓ Docker Certified Associate (DCA) — KodeKloud
- ✓ Certified Jenkins Engineer — KodeKloud
- ✓ Introduction to Agent Skills — Anthropic
- ✓ HashiCorp Certified: Terraform Associate — KodeKloud
- ✓ GCP Cloud Digital Leader — KodeKloud
- ✓ GCP Professional Cloud Architect — Course Completion
- ✓ Claude Code in Action — Anthropic

## COMMUNITY

**DEV Community — Technical Author | 5,000+ Followers**

dev.to/yash_sonawane25 — Practical guides on Kubernetes, AWS, CI/CD, and DevOps tooling focused on real project walkthroughs.

## EDUCATION

**B.Tech — Electrical Engineering** *Exp. 2027*

GH Raisoni College of Engineering, Pune

CGPA: 7.5/10 | XII: 77.8% | X: 79.4%
